

ABSTRACT OF THE DISCLOSURE

A dishwasher is provided with three racks mounted in the cabinet for movement between extended and retracted positions, and utensil baskets removably mounted on the door. The door include hooks integrally molded with the inner wall of the door for receipt
5 in slots on the back of the baskets, so that the baskets can be quickly and easily removed from the door for loading and unloading silverware, utensils, and other small objects to be washed. By mounting the baskets on the door, rack space and loading space is optimized.
